Choosing or recommending the right contractor for your project is, in many ways, similar to wrapping your mind around a design process just started. Always, begin with the end in mind, that is, a beautiful construction project, fully realized with the least amount of stress and hassle.

Choosing the right builder can be easier than you think, they should help you realize your vision, and partner with you for success.

How do I know the right company when I meet them?

- Look for a local established company
- Check out their website for work samples and testimonials
- Use Houzz.com for resources
- Check them out with the BBB and consumer affairs

The first meeting

- Interview at least 3 contractors
- Share your vision and check for synergy, hire someone you like
- What ideas can they bring to the table?
- Choose a company that is well matched to your project

Check references

- Ask specific questions
- Get details on communication
- How were the final details handled?

- Warranty should be standard

Enjoy working with true professionals!

RVM Construction has been serving the Southern California area with quality new construction, additions, remodels and tenant improvements and factory upgrades for over 35 years.
