Spring is the time of year that we tend to think of cleaning, organizing andremodeling. Like so many of us you may have been putting off remodeling projects for the last few years due to the economy and home price stagnation. But, times have truly changed and many of us have pent up demand for home improvement. So why is now the right time?

1. Home prices have stabilized and have started to go up. In fact, according to DataQuick.com, the real estate

tracking authority, prices in Orange County have grown double digits in each of the last two years.

2. It's a sellers' market. Homes that are priced right, look great, and are user friendly are being snapped up, fast! If you are thinking of selling, remodeling first will make it faster and more profitable.

3. Real estate industry experts predict a 4 to 6 year growth in home prices. If past California real estate cycles repeat themselves, then now is the perfect time to remodel. As home prices rise, so will the cost of remodeling. Remodeling now insures more equity as prices rise.

4. Remodeled kitchens and baths will get you top dollar. Nothing sells a home better than beautiful kitchens and bathrooms with all the latest amenities. RVM has 35 years of experience making homes more beautiful and comfortable.

5. You just purchased a new home. You are the smart one, you waited for just the right time to buy, now make it your own and watch your equity grow.

6. You have a new addition to the family. Do you have a 3 bedroom house but a 5 bedroom family? Adding to your home now will increase the value and make your home life more comfortable and livable.

7. The kids have finally moved out and your house hasn't been upgraded in 20 years. Whew! The kids are finally launched and aren't around to ruin the furniture. Now is a great time to make your home just right for life without the kids at home

8. You would like to go green. There are many ways RVM can make your home more energy efficient and utilize green building materials. Call us for a consultation.

9. You crave a more open floor plan. Does your home have a wall between the kitchen and family room? Can you think of a better way to use that dated formal dining room? We can, and have the portfolio to show you. Check us out on Houzz.com.

10. Interest rates are at an all-time low. Interest rates are at 50 year lows, borrowing to improve your home will increase its value and makes great financial sense.
